Akanksha Kumari

Bangalore, Karnataka
Akanksha Linkedin Github Gitlab Portfolio

Professional Summary

Cloud & **DevOps** Engineer with **5+** years of experience **designing** and **operating scalable cloud-native platforms** on **Kubernetes** (GKE). Expertise in building **CI/CD** pipelines, Infrastructure as Code (**Terraform**), and workflow orchestration. Proven track record of **reducing execution time by 40%** and **MTTR by 50%** through automation, monitoring, and optimized cloud architectures.

Professional Experience

- **DevOps Engineer** *June, 2026 - present*
  TCS Bengaluru, India
  - Onboarded into the Cloud Infrastructure team; currently upskilling on cloud infrastructure practices and tooling to support ongoing platform and infrastructure initiatives.
  - Pursuing **additional certifications (Claude AI)** and hands-on experience with Apache Kafka to expand expertise in event-driven and streaming data architectures.

- **Senior Engineer, Software (Platform Developer – Client: Mercedes-Benz R&D India)** *July, 2024 - Jun, 2026*
  Ielektron Technology Bengaluru, India
  - Developed **automated, production-grade data pipeline** for **use-case-driven data transfer from Maglev to GCS**, securely integrating applications with **GCS** to streamline workflows and **improve data ingestion efficiency.**
  - Integrated the platform with a **user interface to display real-time task status by developing and consuming APIs,** improving visibility and user experience.
  - Designed and deployed a **scalable cloud-native platform** on **GKE**, fully **automating workflows** and **eliminating manual execution** (**100%** reduction in manual runs).
  - Built **Flyte-based Python workflows** using **Kubernetes PodSpec** customization and **Helm charts** for containerized deployments, optimizing resource utilization and **reducing execution time by 40%**.
  - **Optimized Kubernetes resource** configurations, **improving reliability** and **cost efficiency** of production workloads.

- **Associate (GCP Cloud Engineer - Client: Google)** *July, 2021 - July, 2024*
  Cognizant Technology Solutions Hyderabad, India
  - Designed and **implemented CI/CD pipelines** using **Cloud Source Repositories** and **Cloud Build** to automate build, test, and deployment workflows.
  - Built **automated deployment pipelines** to **Cloud Run**, enabling **rapid and consistent releases** on every successful code integration.
  - **Containerized applications** using **Docker** and managed deployments on GCP-based platforms.
  - Supported **infrastructure automation** using **Terraform** for i**nfrastructure and version-controlled provisioning.**
  - Implemented **monitoring and logging solutions** using Cloud Monitoring and Cloud Logging, **reducing MTTR** and **application downtime by 50%**.
  - Proactively identified and **resolved infrastructure** and **deployment issues** impacting production systems.
  - Collaborated with engineering and support teams to **improve system reliability and deployment stability**.

Technical Skills

- **Scripting Languages :** Python, Shell
- **Cloud Technologies :** Google Cloud Platform (GCP), AWS
- **Containers & Orchestration:** Docker, Kubernetes, GKE, Helm
- **Monitoring & Observability :** Cloud Monitoring, Cloud Logging, Grafana
- **CI/CD :** GitLab CI, Cloud Build
- **Workflow Orchestration :** Flyte
- **Version Control:** GitHub, GitLab
- **Infrastructure as Code:** Terraform, Pulumi

Certifications

- Google Cloud Professional Cloud Architect *Jan, 2023*
- Google Cloud Associate Cloud Engineer *Dec, 2021*

ACCOMPLISHMENTS

- **Client Appreciation from Mercedes :** Recognized for delivering a **fully automated platform** improving user interaction and operational efficiency.
- **Best Performer Award from Google :** Awarded for improving ticket resolution **efficiency and contributing to a 30% increase** in team productivity.

PROJECTS

- **Automation of the Production-Grade GCP infrastructure:**
  - **Designed** and **developed a modular Terraform** codebase to provision GCP infrastructure across multiple environments.
  - **Implemented remote Terraform state management** using **Google Cloud Storage (GCS)** and **reusable modules** for VPC, subnets, firewall rules, IAM, Cloud Router, and Cloud NAT.
  - **Automated infrastructure deployment** through **GitLab CI/CD** pipelines with **validation**, **planning**, and **deployment stages**.
  - **Documented the infrastructure architecture and deployment workflow**

EDUCATION

B.Tech - Computer Science Engineering | 84% *July, 2017 - July, 2021*
Rungta College of Engineering and Technology Bhilai
